

Credit Monkey Credit Repair Services

Prepared for the static GitHub Pages website. Implementation date: May 20, 2026. Target market: United States, with California priority coverage.

Lighthouse lab results after implementation

Final deliverable	Status
Optimized website code	Implemented
Structured data	Organization, FinancialService, Service, FAQ, Breadcrumb, Article, Review graph
Local landing pages	10 California city pages generated
Sitemap + robots	Regenerated for 79 indexable URLs; backend/admin blocked
PDF report	This document

Executive Summary

The site moved from a mostly generic static credit repair site to a stronger California-focused SEO architecture. The implementation added crawlable local pages, content-hub pages, consistent canonicals, richer schema, safer robots rules, improved footer/internal links, WebP primary visuals, deferred third-party scripts, and accessibility fixes that lifted Lighthouse SEO, Accessibility, and Best Practices to 100 in local testing.

Area	Before audit signal	After implementation
Indexation	Sitemap omitted new local intent pages; admin/offline handling was weak	79 public URLs in sitemap; admin/backend/api blocked; noindex added where appropriate
Local SEO	Only a California state page; no city-level pages	10 static California city pages with localized copy, FAQ, Service schema, and internal links
Content depth	Limited topical cluster coverage	5 resource pages for collections, late payments, bankruptcy, identity theft, and score improvement
Structured data	Partial schema on core pages only	Sitewide page graph plus Service, FAQ, Breadcrumb, Article, Local/FinancialService schema
Performance	Cache-prevention meta, eager third-party trackers, heavy PNG hero	WebP assets, deferred scripts, removed early tracking, cache-friendly asset versioning

Lighthouse Results

Category	Score
Performance	86
Accessibility	100
Best Practices	100
SEO	100
FCP	2.6 s
LCP	3.4 s
CLS	0.002
TBT	30 ms

Technical SEO Audit

- 82 HTML pages audited after implementation, excluding backend runtime files from GitHub Pages SEO scope.
- All public pages now pass local checks for one H1, canonical presence where indexable, schema presence, and zero broken internal HTML links.
- robots.txt allows public crawling while blocking /admin.html, /admin/, /backend/, /api/, and /private/.
- sitemap.xml regenerated with clean canonical URLs, 2026-05-20 lastmod values, and priorities aligned to business value.
- Rendered assets now use WebP for the primary hero, investigation, logo, and favicon while retaining PNG files for social/crawler compatibility.

Issues Found and Fixed

Issue	SEO risk	Fix implemented
No city landing pages	Low relevance for credit repair Los Angeles, San Diego, San Jose, etc.	Generated 10 local static pages under /locations/
Thin local linking	California page did not distribute authority to city targets	Added city hub links on California/state pages and footer
Early third-party tracking	Worse LCP/TBT and third-party cookie warning	Removed inline FlexOffers loader; lazy-loads only when needed for tracked referrals
Weak schema consistency	Partial eligibility for rich results and entity understanding	Added sitewide JSON-LD graph and page-specific schemas
Accessibility form gaps	Lower trust and lower Lighthouse accessibility	Added label associations and fixed CTA accessible names
No-cache HTML meta	Unhelpful for repeat visits and static hosting	Removed cache-prevention meta and uses versioned assets

Keyword Strategy

The strategy prioritizes transaction-intent service terms, California modifier terms, and problem-aware long-tail queries. The site now has dedicated landing pages for the highest-value California city modifiers and supporting resource pages for issue-based searches.

Cluster	Primary keywords	Search intent	Implemented asset
Core services	credit repair services, best credit repair services, credit repair company	Compare providers and pricing	/services, /pricing, homepage schema
California local	credit repair California, credit repair services California	Find a provider serving California	/states/california plus city pages
Los Angeles intent	credit repair Los Angeles, credit restoration Los Angeles	Local provider selection	/locations/los-angeles
Problem removal	collections removal, late payment removal, bankruptcy credit repair	Solve a specific negative item	/resources/* pages
Score building	credit score improvement, fix bad credit, build personal credit	Education plus conversion	/resources/credit-score-improvement, /build-personal-credit

Content Silo Map

Pillar	Support pages	Next additions
Credit Repair Services	collections, late payments, identity theft, bankruptcy	charge-off removal, repossession removal, hard inquiry removal
California Credit Repair	10 city landing pages	Orange County, Inland Empire, Bay Area county pages
Credit Education	score improvement, personal credit, business credit	utilization calculator, dispute letter guide, credit report checklist

Local SEO Strategy

The implementation targets California with individual pages for Los Angeles, San Diego, Sacramento, San Francisco, Fresno, Oakland, San Jose, Anaheim, Long Beach, and Riverside. Each page includes unique local copy, local issue framing, FAQ schema, Service schema, nearby-area links, and conversion CTAs.

City page	Primary modifier	Local angle
Los Angeles	credit repair Los Angeles	High rent, medical collections, entertainment income volatility
San Diego	credit repair San Diego	VA loan readiness, military relocation reporting
San Jose	credit repair San Jose	Silicon Valley mortgage and identity-theft pressure
Riverside	credit repair Riverside	Inland Empire auto-loan and mortgage readiness
San Francisco	credit repair San Francisco	Rental screening and premium financing readiness

Google Business Profile Recommendations

- Use exact NAP consistently across site, GBP, directories, and citations.
- Choose categories around Credit Counseling Service / Financial Consultant where eligible; avoid unsupported legal claims.
- Add service-area listings for California and major served cities.
- Publish weekly GBP posts on credit education, California service areas, and compliance-friendly tips.
- Request reviews with service-specific language but never incentivize reviews or request misleading claims.

EEAT and Trust Optimization

- Compliance-forward language added to local/resource pages: no guarantee of score increases and no removal of accurate, current, verifiable items.
- Footer trust links now surface About, Contact, Privacy, Terms, Disclosures, and service resources on crawlable HTML.
- Resource pages emphasize consumer rights, documentation, and transparent process rather than aggressive deletion promises.
- Schema reinforces the organization, service area, service offering, breadcrumb hierarchy, and FAQ answers.

Compliance References Used

Source	SEO/trust implication
FTC Credit Repair Organizations Act - https://www.ftc.gov/enforcement/statutes/credit-repair-organizations-act	Avoid upfront-fee and misleading guarantee language; explain cancellation/disclosure rights.
CFPB credit repair scam guidance - https://www.consumerfinance.gov/askcfpb/1343/how-can-i-recognize-credit-repair-scam.html	Consumers can dispute errors for free; avoid promises and advise accurate reporting standards.
California DOJ CSO registration guidance - https://oag.ca.gov/consumers/general/csiform	California requires careful registration/compliance messaging; registration is not an endorsement.

Competitor Analysis

Current competitor patterns in California/Los Angeles credit repair SERPs show a mix of local providers, comparison pages, and national brands. The strongest pages combine service specificity, local proof, FAQ blocks, transparent pricing/process claims, and compliance disclaimers.

Competitor pattern	Observed examples	How Credit Monkey now outperforms
Local provider pages	RR Credit Fix, MCL Financial Services, Serrano Financial	Dedicated city pages, schema, crawlable footer links, richer issue-specific content
Authority/story pages	Imax Credit Repair emphasizes tenure and founder story	About/trust content linked sitewide; next step is founder/expert byline expansion
Comparison/listicle SERPs	Zogby and creditrepaircompanies.com rank national brands	Credit Monkey needs comparison-style blog content and backlinks to compete for best/broad terms
Compliance trust	Top pages include CROA/no-guarantee disclosures	Compliance language added across local/resource pages and disclosures linked from footer

Backlink Opportunities

- California finance, mortgage broker, real estate, auto finance, and tenant-resource partnerships.
- Local chamber and directory citations for each target city where business eligibility allows.
- Guest content on credit education, identity theft recovery, and homebuyer readiness.
- Digital PR around California credit-report error trends and consumer-rights education.

Performance and GitHub Pages Optimization

Optimization	Implemented
Static crawlability	All new local/resource pages are static HTML, not SPA-only content
Sitemap	Clean static sitemap with 79 indexable URLs
robots	Public crawl allowed; backend/admin/private blocked
Assets	WebP primary visuals; versioned CSS/JS
Third-party scripts	Removed eager LeadConnector and FlexOffers script loading; tracking loads only when needed
Core Web Vitals lab	CLS 0.002, TBT 30 ms, LCP 3.4 s in local Lighthouse

Remaining Performance Roadmap

- Trim Bootstrap CSS to only used components or move to a custom critical CSS build.
- Inline above-the-fold critical CSS for homepage and city page templates.
- Self-host fonts or switch to system font stack for the fastest FCP.
- Split conversion features into idle-loaded modules instead of one large script.js file.
- Add responsive srcset variants for hero, logo, and investigation imagery.

Future SEO Roadmap

Priority	Task	Expected impact
P1	Submit sitemap in Google Search Console and inspect /locations/los-angeles and /states/california	Indexation and early diagnostics
P1	Create GBP service-area strategy and citation cleanup	Local pack and branded trust
P2	Publish 12 supporting guides: charge-offs, repossessions, hard inquiries, medical debt, mortgage readiness	Topical authority growth
P2	Add expert author/reviewer bios and case-study format testimonials	EEAT and conversion lift
P3	Build comparison pages: Credit Monkey vs national alternatives; best credit repair California guide	Mid-funnel ranking capture
P3	Digital PR and partner backlinks	Authority and ranking durability
